

Abdullohaziz Jumanazarov

INTERN

Profile

I am a young and motivated Node.js Backend Developer with hands-on experience in a real project, having developed the backend for a hospital management system. I strive to gain in-depth knowledge of Node.js and NestJS and am highly focused on meeting client needs and delivering high-quality software solutions. Currently, I am expanding my skills by learning frontend development, particularly the React library. Through my project experience, I emphasize writing clean code, building efficient backend architectures, and leveraging modern technologies. Additionally, I am committed to continuously improving my skills and contributing effectively to impactful projects within the company.

Education

Student, Najot ta'lim, Fergana

2023 – 2024

I began my programming journey at Najot Ta'lim IT Learning Center, where I initially focused on foundational concepts and algorithms. At the Foundation level, I gained a solid understanding of algorithms. As I progressed into the Full-stack Bootcamp, I specialized in backend development and am now learning frontend development.
